

# SERVICE BULLETIN

from: TRIO-KENWOOD COMMUNICATIONS, INC.

SUBJECT: TS-120S VOX OPERATION PICK-UP TIME

DATE 7/10/79

High speed CW OPS may inquire about partial loss of the first character when operating VOX-CW. The transceiver will operate up to about 20WPM before this is apparent.

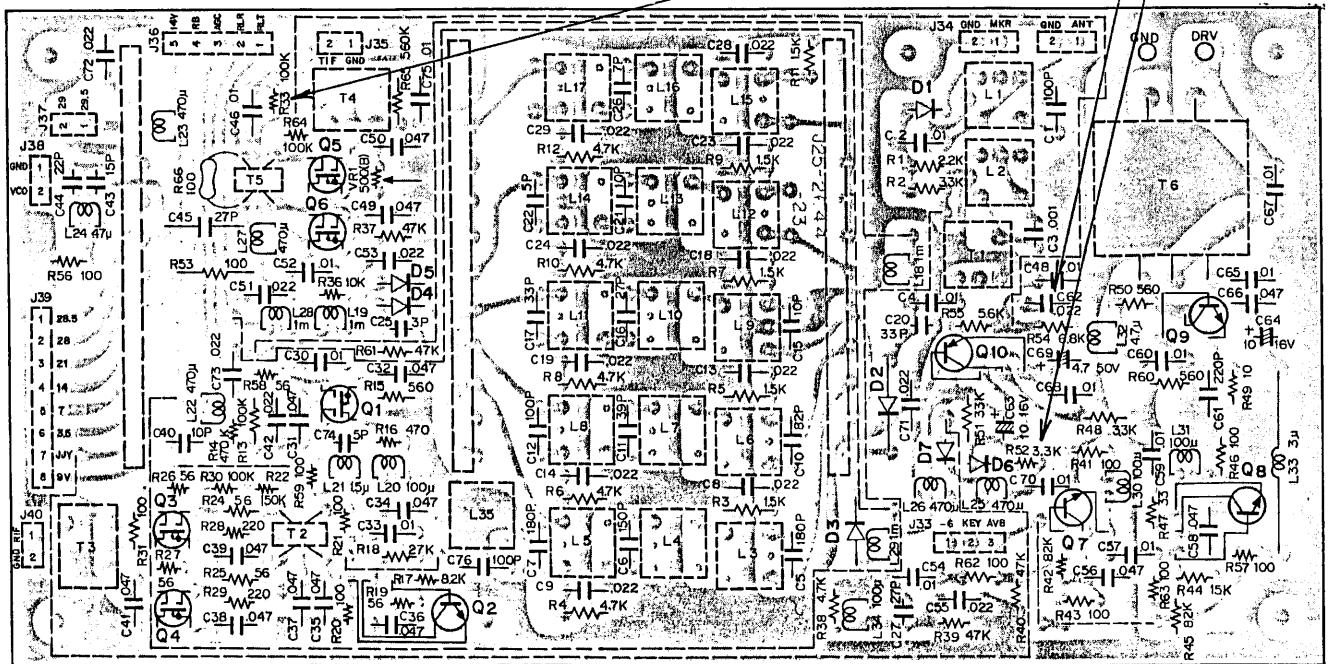

Improvement may be had by changing three components on the RF unit, X44-1260-01.

R33 100K ohm, change to 150K ohm  
R52 33K ohm, change to 4.7K ohm  
C62 .022uF, change to 1uF @ 50V

Production later than Serial # 940701 has this change.

Please notate your Service Manual.
