SUBJECT: TR-7600/7625 AUDIO TONE ON TX

DATE 8/10/79

Some TR-7600/7625 users report a low background tone during TX, especially noticeable at full quieting by the receiving station.

On the PLL unit X50-1580-00, change;

- * L18 from 22 μ H to 33 μ H
- * C61 from 22pF to 33pF
- * C60 from 22pF to 10pF
- * C42 from 22pF to 39pF, or bridge 18pF across foil side & leave original C42 in place. No adjustment necessary.

New Part L18 33 μ H L40-3301-03
